

Warren Theo Simpson

Counsellor/Teacher

My main objective within a working environment is to facilitate and promote personal growth. Through my past experiences I have accumulated a variety of skill sets and knowledge that I can apply in the classroom. Additionally, I value the importance of continuing to learn and acquire new abilities to utilize them in both work and everyday situations. I pride myself in the level of creativity I am capable of, particularly focusing on creating new crafts and digital materials that can be implemented in lessons. I work very well with others and consistently find myself offering help where possible. I'm the type of person who always strives to give his absolute best as a teacher.
